UPLOADED, CHECKED & VERIFIED

C2-WEB ANALYSIS – A LOAD OFF YOUR MIND

C2-Web provides an advanced data processing and checking facility allowing users to configure just how they want the data processed and verified.

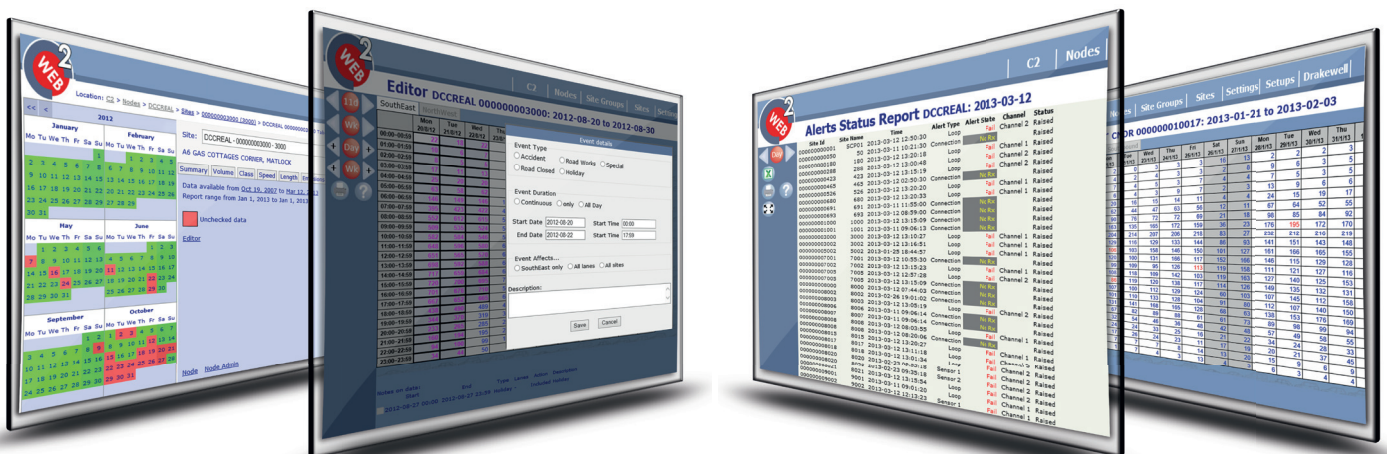

The Drakewell Instation reads data directly from GPRS/IP enabled recorders to the C2-Web database in realtime or at intervals defined by the user. The health of recorders can be checked, while our powerful data checking engine automatically examines loaded data and notifies users of any potential issues.

The Drakewell Instation Supports ATC, Bluetooth, ANPR, Images and Alerts from a range of manufacturer devices.

Users can upload raw data files that have been collected manually and with support for over 50 file types including ATC (temporary and permanent), ANPR, Bluetooth, Manual Count, Turning Movement and many bespoke formats, users can be confident their needs are met. Per Vehicle Records and Binned Data types are supported throughout C2-Web.

FEATURES:

- > DATA CHECKING & VERIFYING
- > RECORDER HEALTH CHECKING
- > SUPPORTS OVER 50 FILE TYPES
